

Your Health Matters: Schedule Your Breast Cancer Screening Today!

Breast cancer is the most common cancer and the second leading cause of cancer death in women. A woman has a 1 in 8 chance of developing breast cancer.¹

A mammogram is an X-ray of the breast and is the best way to detect signs of breast cancer. Early detection can lead to better outcomes.

The U.S. Preventive Services Task Force recommends a mammography screening once every other year for women ages 40 to 74.

As an **HMSA member**, women ages 40 and older can get a mammography screening once every year at no cost.

Make your appointment today. There is no need for a referral from your health care provider. See the list of mammography imaging centers to find one near you.
